COURSE PRACTICE WORKSHEET

Responsive layout test sheet

Work through these four exercises, then compare your result with the lesson examples.

1. Check narrow content

Open your page at 320 and 430 CSS pixels. Check long titles and navigation without horizontal page scrolling.

2. Compare arrangements

Use one column when cards are cramped and more columns when they fit. Explain the content need behind your breakpoint.

3. Stress the layout

Enlarge text, add a long title and test immediately below and above each breakpoint.

4. Review media

Check that images keep their aspect ratio and fit their container. Record each tested width and any remaining issue.
