COURSE PRACTICE WORKSHEET

Service page planning worksheet

Work through these four exercises, then compare your result with the lesson examples.

1. Choose a service

Pick a local service and name its intended customer. Write the customer's main question in one sentence.

2. Outline useful content

Draft a descriptive title, one main heading and three sections answering customer questions. Avoid promises you cannot support.

3. Inspect the HTML

Check heading order, meaningful link text and readable page content. Explain which parts would be produced by a server template.

4. Review on mobile

Read the page at a narrow width. Check navigation and a contact button with the keyboard. Record one improvement and its reason.
