COURSE WORKSHEET

Your learning plan

Turn one course lesson into a small, practical next step.

1. Choose one goal

Write one thing you want to understand after this lesson.

2. Try a small example

Put the idea into practice. Keep your first example simple.

3. Record what happened

Note what worked, what surprised you and one question to ask.

4. Review and repeat

Explain the idea in your own words, then choose your next step.
